

# Four Column Layout :: CHEAT SHEET

## Basics

**Thank you** for making a new cheatsheet for R!  
These cheatsheets have an important job:

**Cheatsheets make it easy for R users to look up useful information.**

Remember that the best cheatsheets are **visual**—not written—documents. Whenever possible use visual elements to make it easier for readers to find the information they need.

1. Use a **layout** that flows and makes it easy to zero in on specific topics.

2. Use **visualizations** to explain concepts quickly and concisely.

3. Use visual elements to make the sheet **scannable**.

4. Use visual **emphasis** (like color, size, and font weight) to make important information easy to find.

dplyr::lag() - Offset elements by 1  
dplyr::lead() - Offset elements by -1

## Layout Suggestions

Use headers, colors, and/or backgrounds to **separate or group together sections**.

**Create a visual hierarchy.** Help users navigate the page with titles, subtitles, and subsubtitles

### Title

#### SUBTITLE

#### SUBSUBTITLE

**Fit sections to content.** Try several different layouts.

Use numbers or arrows to link sections if the order/**flow** is confusing.

Quickly identify content with a **package hexsticker** (if available)

## Copyright

Each cheatsheet should be licensed under the creative commons license.  
To license the sheet as creative commons, put CC'd by <your name> in the small print at the bottom of each page and link it to <http://creativecommons.org/licenses/by/4.0/>

## Useful Elements

### CODE

Where possible, use **code that works** when run.

```
ggplot(mpg, aes(hwy, cty)) +  
  geom_point(aes(size = fl)) +  
  geom_smooth(method = "lm")
```

Word balloons

can help explain

code

### ICONS

These are just **font awesome** characters

### MOCK TABLES

### MOCK GRAPHS

### TABLES

| sub-option       | description                                                            |
|------------------|------------------------------------------------------------------------|
| citation_package | The LaTeX package to process citations, natbib, biblatex or none       |
| code_folding     | Let readers to toggle the display of R code, "none", "hide", or "show" |
| colortheme       | Beamer color theme to use                                              |

## Logistics

### FONTS

This template uses several fonts: **Helvetica Neue**, **Menlo**, **Source Sans pro**, which you can acquire for free here, [www.fontsquirrel.com/fonts/source-sans-pro](http://www.fontsquirrel.com/fonts/source-sans-pro), and **Font Awesome**, which you can acquire here, [fontawesome.github.io/Font-Awesome/get-started/](http://fontawesome.github.io/Font-Awesome/get-started/)

To use a **font awesome** icon, copy and paste one from here <https://fontawesome.com/v4/cheatsheet/>  
Then set the text font to font awesome.

### KEYNOTE

I make my cheatsheets in **Apple Keynote**, and not latex or R Markdown, because presentation software makes it much easier to tweak the visual appearance of a document

### KEYNOTE TIPS

- **Select multiple elements** by holding down shift and then selecting each. Click on a selected element before letting go of shift to unselect it.
- To **group elements together**. Select them all, then click Arrange > Group
- To **evenly space multiple objects**, select them all then Right Click > Align objects or Right Click > Distribute objects
- Click on a table, then visit Format > Table > Row and Column Size to make **even width rows/columns**.

**YOUR LOGO**  
(optional)

# Three Column Layout: : CHEAT SHEET

## Basics

**Thank you** for making a new cheatsheet for R! These cheatsheets have an important job:

**Cheatsheets make it easy for R users to look up useful information.**

Remember that the best cheatsheets are **visual**—not written—documents. Whenever possible use visual elements to make it easier for readers to find the information they need.

1. Use a **layout** that flows and makes it easy to zero in on specific topics.

2. Use **visualizations** to explain concepts quickly and concisely.

**summary function**

3. Use visual elements to make the sheet **scannable**.

4. Use visual **emphasis** (like color, size, and font weight) to make important information easy to find.

dplyr::lag() - Offset elements by 1  
dplyr::lead() - Offset elements by -1
